

EMPOWER
PROCUREMENT

Benchmarking for Carbon-Conscious Purchasing

WEBINAR SERIES

Empower Procurement is a program led by Prospect Silicon Valley and funded by the California Energy Commission. Our team is made up of industry experts from Energy Solutions, Lawrence Berkeley National Lab, the Zero Net Energy Alliance, and other organizations. We help organizations reach their clean energy goals by improving their procurement process to acquire energy-efficient products and related services. The program provides institutions with access to strategic research and analysis, tailored to their specific needs and goals. By providing recommendations, we aim to bridge the gap between clean energy providers and institutional clients with ambitious sustainability goals, and contribute to an increase in the adoption of clean technologies.

This webinar series brought to you by Energy Solutions and Prospect Silicon Valley will provide you with the knowledge and resources to assess and improve how your organization conducts benchmarking for sustainability outcomes. Benchmarking for carbon-conscious purchasing will focus on benchmarking as it relates to the procurement of DER products and services.

UPCOMING EVENTS

March 31, 2-3pm

MODULE 2

Benchmarking through the Roles, Rules, and Tools Framework: Roles

We will be exploring the function of roles in the *Roles, Rules, and Tools* methodology. Assigning someone or a team to specifically oversee sustainable procurement enables an organization to prioritize sustainable procurement and streamline product purchasing decisions and transactions. [Register here.](#)

May 5, 2-3pm

MODULE 3

Benchmarking through the Roles, Rules, and Tools Framework: Rules

Continuing our discussion of the Roles, Rules, and Tools methodology, this webinar will be focusing on how establishing procurement "rules" can contribute to successful sustainable purchasing. These can be integrated seamlessly into your Climate Action Plan or other organizational guidelines.

June 2, 2-3pm

MODULE 4

Benchmarking through the Roles, Rules, and Tools Framework: Tools

Concluding our three-part series on the Roles, Rules, and Tools methodology, our final webinar will be examining the available tools, platforms, and resources available that can facilitate sustainable purchasing.
